## 1.0 PROJECT INFORMATION

- 1.1 Project name:** Piggery and Goats Farming Project For Single Needy Mothers with Malnourished Children
- 1.2 Target:** 200 Single needy mothers families with malnourished children in Iganga District.
- 1.3 Duration (months):** 24 months
- 1.4 Estimated Cost:** 51564.4\$
- 1.5 Requested Funds:** 49112.4\$
- 1.6 Implementing Agency:** WORLD FOR LIFE (Established in 2018)
- 1.7 Registration No.:** IDLG/369/18 (Community Based Service Dept.- Iganga Dist Local Govt.)
- 1.8 Registration No:** IMC/ CD/ 016 (Iganga Municipal Council)
- 1.9 URSB Reg. No.:** 80020001460157(Certificate of Incorp. as Co. Ltd by guarantee)

## 2.0 PROJECT DETAILS

### 2.1 WHO WE ARE

Dear Development Partner,

Greetings from '**WORLD FOR LIFE**' abbreviated as **WFL**. WFL is a vibrant and up-coming Christian youth led, indigenous community based non-government organization. WFL is fully registered non-profit organizations and has been operating in Iganga district, Busoga sub region in Eastern Uganda since 2018. Since inception, WORLD FOR LIFE takes pride in its ability to network and collaborate with local and international Development partners like: Future Africa Leaders Foundation, Inner City Mission for Children, Youth Achievers Forum, Youth Volunteer Networks, Akiba Options Africa Ltd, Work For Life organization, Iganga Network of Young People Living with HIV/AIDS and work closely with Ministry of Education and Sports; Ministry of Health, District Local Councils at home.

We are therefore delighted once again to inform you that WORLD FOR LIFE is soliciting for your financial support to distribute pigs and goats to single needy mothers' families with malnourished children in Iganga district. The major purpose for this project will be to provide start-up piglets and goats to single needy mothers and families with starving children to enable them to increase house hold income and improve their food security, livelihoods, way of living and become a sustainable platform for lifting people out of poverty.

## **2.2 VISION**

WORLD FOR LIFE envisions a prosperous community that provides love, care and security especially to all children, youth and women in a happy family environment with access to basic needs for improved livelihoods and well-being of the people.

## **2.3 MISSION**

WFL core business is: 'To empower and support vulnerable children, youth and women and their respective families to achieve their full potential through creating supportive environment that upholds their rights to survival, development, protection and participation to make responsible and productive citizens of Uganda'.

## **2.4 ACHIEVEMENTS**

WORLD FOR LIFE has been active at empowering marginalized children at risk, youth boys and girls with their respective families; and supporting refugees through grass-root activities, entrepreneurship, mentorship, provision of education educational sponsorship and scholastic materials; health services and sports and games in order to make a contribution to the improvement of the socio-economic status and well-being of the rural poor people. WFL has been able to make the following achievements in the following areas:

In **Child Health and Nutrition**, WFL conducted a number one medical camp in collaboration with health providers where 250 children and 50 pregnant mothers benefited from free medical checkups, dental care, polio vaccination and other health promotion activities to increase their access to better health services and well-being.

In **Family Strengthening and Livelihood**, WFL empowered 120 families especially the single needy mothers' families with entrepreneurial skills trainings, financial literacy awareness and formed savings and credit groups to become financially independent as a means of fighting poverty to improve their livelihoods and provide basic needs for their children.

In **Education Program**: we were able to reach out to 7,000 indigent children and young people. We engage parents, care takers, local leaders, and other duty bearers to conduct three innovative strategies that included community awareness, go back to school, Pre-school initiative campaigns. The children received some scholastic materials, gained life skills, and were regained from many forms of child labor like sugar cutting, brick making, and rejoined the school system.

In **leadership and empowerment for the girl child**: WFL works with schools and female football clubs in the eastern region of Uganda to empower girls to reduce the school dropout rate by

+256753665010

providing and training them to make sanitary products, connecting interested young female talented footballers to schools that offer sports scholarship, teach girls about their values in Christ and reproductive health.

In **My disability matters:** WFL identified 60 children with disabilities that need urgent support. They were found in four communities namely Nawanzu, Bukwaya, Nakiseni villages and Kasoko ward in Iganga Municipality. The types of disabilities include mental illness, physical leg and arm deformities, hearing impairments. The children are marginalized, most do not attend school, do not have access to proper medical services and their voices are not heard in society. The major reasons include lack of adequate policies and legislation.

In **WFL Children's Home:** WFL takes care of 10 vulnerable children, they come from a variety of difficult backgrounds. Many were abandoned and rejected by their parents due to poverty and some lost their parents to diseases and/or during birth. The Home provides them with love and care, physical social, mental and spiritual needs; and live in a typical conducive family environment that allows them experience all that it requires for means to have a child friendly family. But, because of limited resources, we cannot take on more.

In **Refugees Program:** WFL in partnership with Kasanga Refugee and Hope Center with 160 refugees from DR Congo, Rwanda and South Sudan WFL conducted six discipleship and games and sports programs to help them experience the love of Christ which open doors for them and offer a platform for healing their past wounds. The youth testify that because of sports, they are able to experience the healing and rebuilding of their football careers that give them brighter future.

### 3.0 PROBLEM ANALYSIS AND PROJECT DESCRIPTION

Most of the single mothers' headed families in our community are in condition of extreme poverty and consequently they have no possibility to afford the costs of basic needs, such as shelter, food and clean water. The majority of these families have an average number of three children per household and they struggle to survive by doing odd jobs and try to practice agriculture but due to their lack of knowledge about modern practices of farming dictates their agricultural produce. Most of these face intersecting challenges like malnutrition, hunger, and increased food insecurity which has led to rampant spread malnourishment among the children and vulnerable single expectant mothers.

This has highly hindered human, social, and economic development in our community. More than one third of all young children – 159,241 – are stunted. The damage caused by stunting is irreversible. Half of children under five and one quarter of child-bearing-age women are Anaemic. 16% of children under 5 are underweight, 6% are wasted and 12% of women of child bearing Ade are malnourished. Under nutrition is responsible for four in 10 deaths of children under five

As part of our strategic plan in the next three years, WFL plans to distribute piglet and goats to single needy mothers' families with malnourished children in Iganga district. The project will be one of the biggest projects for single needy mothers' with malnourished children and it will help

+256753665010

them raise their status quo above the prevailing catastrophes thus enabling them to protect their children from poverty and its effects. We also intend to establish community model farm to train community members on modern agricultural practices to improve on livelihoods and productivity.

### **3.1 PROJECT OBJECTIVE**

Ensure poverty alleviation among single needy mothers' families through boosting and promoting modern and scientific approaches of farming to enable communities overcome challenges related to Malnutrition and Inadequate food security for sustainable development.

### **3.2 SPECIFIC OBJECTIVES**

1. Providing care and support to children with severe acute malnutrition
2. To foster socio-economic and spiritual development of the single needy mothers in the community to enable them raise successful families.
3. To set up a community demonstration farm where community come to train and seek information about modern agricultural practices.

### **4.0 IMPLEMENTATION STRATEGY**

The under-mentioned strategies will be carried out to achieve the set objectives.

1. Beneficiary mobilization and sensitization for further understanding of the project.
2. Purchase and distribution of livestock (goat, pigs).
3. Protect the livestock (pigs, goats) from being sold.
4. Supervision, monitoring, reporting and Evaluation of project activities.

### **5.0 JUSTIFICATION**

#### **1. Challenge that single needy mothers' families with malnourished children meet:**

Most of the single needy mothers' families with starving children are financially unstable and could not afford to meet the basic needs for their families. Lack of financial support has led to the rampant spread of malnourishment among the children in single needy mothers' families since they could not afford to access proper health services and nutritive food for their children to live a healthier and happier life.

#### **2. Solution:**

By providing piglets and goats, the single needy mothers and their starving children will be able to benefit financial gains and profits that will enable their households have proper food, clothing, and shelter and also have the capacity to access proper medication.

### **6.0 MONITORING AND EVALUATION**

The project will be monitored by WORLD for LIFE trained executives and jointly with the beneficiaries under the Project. Every activities carried out will be monitored to ascertain whether it is done correctly, at the given time frame and whether the desired effect(s) is

BAKAKI YUSUF  
ADMINSTRATOR

HEAD AGRICULTURE  
+256753665010

achieved. A monitoring questionnaire will be prepared by the organization and used daily by the monitors.

Evaluation would be done from to time at the middle period of implementation and end of each activity.

## 7.0 PROJECT FEASIBILITY AND SUSTAINABILITY

The people in the operational communities are peasant farmers who have been involved in all their lives in livestock (cows, goats, sheep and pigs). The technology is not new, it part of the way of life of the people.

The people are familiar with the raising of goats and pigs and the breeds that would be selected and bought are suited to the areas.

Also goats and pigs are easy to raise involving little or no cost and use of locally available materials for food and housing which ensures continuity needs external support.

We also intend to use a revolving strategy where by the people given the piglet and goats would return one of its kind after birth to enable the organization to reach out to more other vulnerable people in the community.

## 8.0 BUDGET

### 8.1 BUDGET LINE ITEM DONOR AGENCY'S CONTRIBUTION

NO	ITEMS	QUANTITY	UNIT COST USD	TOTAL COST USD
1	Goats (female)	50	88	4400
2	Goats (male)	50	122	6100
3	Soars (female pig)	150	54	8100
4	Boars (male pig)	150	69	10350
5	Animal Feed	120 bags	26	3120
6	Water Well	Lump sum	1490	1490
7	Drugs & Vaccines	Lump sum	1220	1220
8	Transportation of goats, pigs and other items to project site.	Lump sum	689	689
9	Farm attendants	5		2303
